# IOWA FLOOD INFORMATION SYSTEM

The Iowa Flood Information System (IFIS) is a one-stop web-platform to access community-based flood conditions, forecasts, visualizations, inundation maps and flood-related data, information, and applications

# FLOOD ACTION VR

# Intelligent Systems

**ML and AI**

# Structured Knowledge

*What location did receive the maximum rainfall in Iowa City on 25<sup>th</sup> of June 2008 at 5:30 PM?*

✓ TEXT INPUT

✓ MULTI-SELECTION

✓ VOICE INPUT

## KNOWLEDGE BASE

*Using our information-centric ontology that captures hundreds of concepts and attributes in flood domain.*

*What location did receive the maximum rainfall in Iowa City on 25<sup>th</sup> of June 2008 at 5:30 PM?*

Natural Language Processing

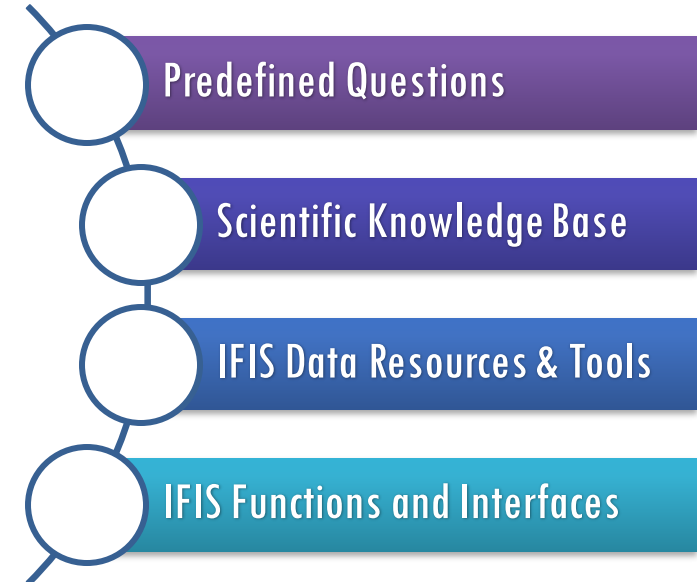

Ontological keywords = rainfall, maximum rainfall  
Location = Iowa City  
Time = 06/25/2008 17:30  
Desired answer type = Coordinate

## INFERENCE

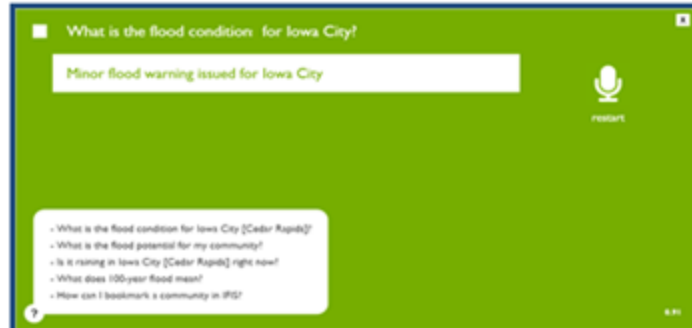

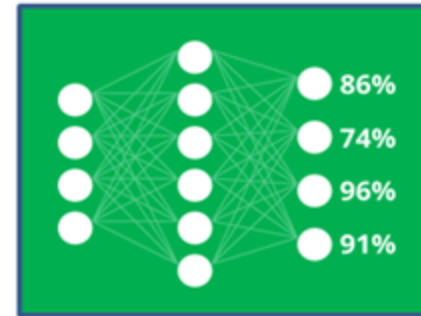

- Matching attributes to concepts
- Location & Date Analysis
- Intent Specification

## SCORING

*Using the information extracted from the natural language question as a criteria for matching to predefined questions.*

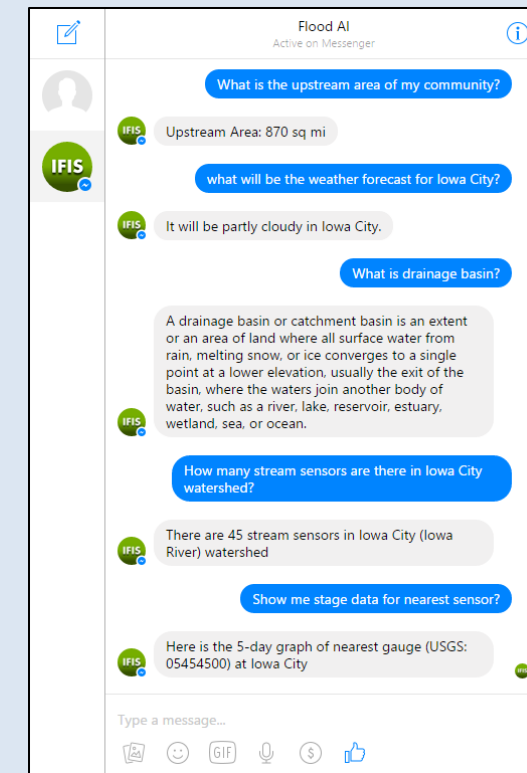

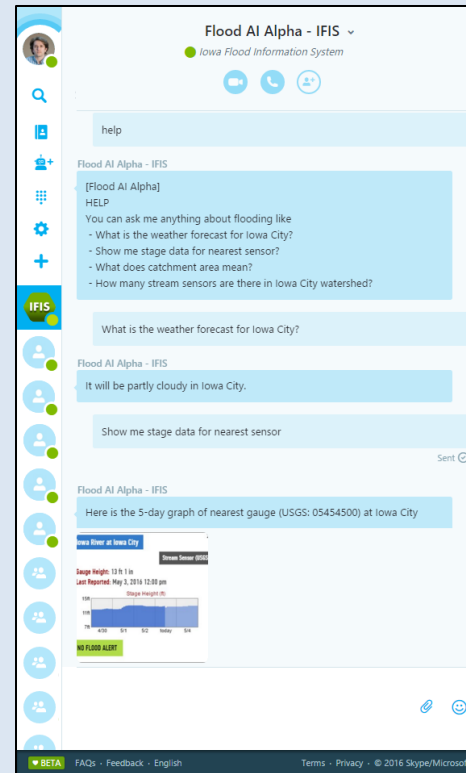

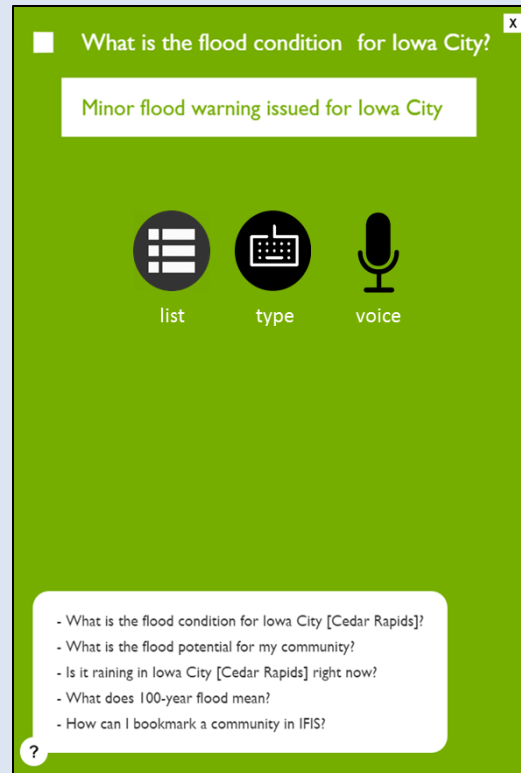

## USER INTERFACE

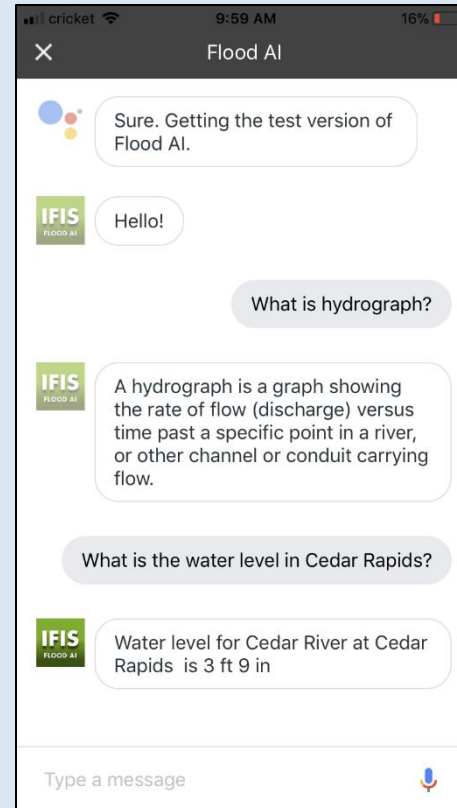

*Friendly user interface providing real-time analysis of voice-enabled question*

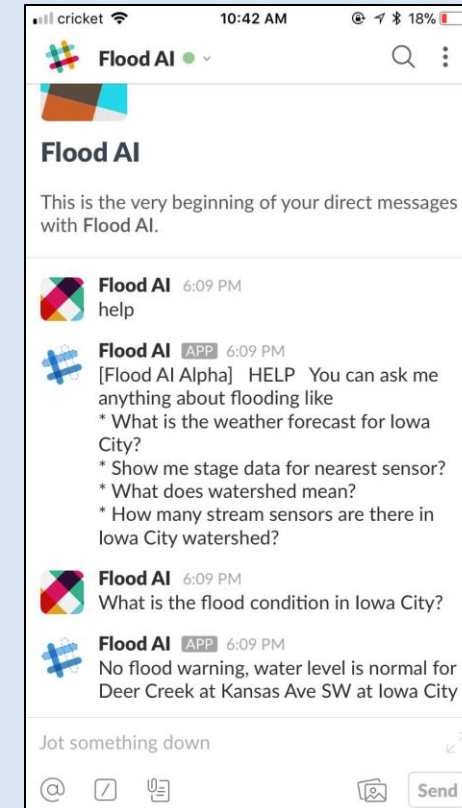

# Smart Assistants

# Smart Assistants
