Data Needs and Challenges

- Geographic scale of parcels
- Timeliness/Cost of data collection
- Keeping records up-to-date
- Accuracy
- Reactive / Proactive information
- Compliance assurance
- Extracting insights & priorities

Expanding Data Options & Insights – No “Silver Bullet”

	Coverage & Refresh Rate	Positional Accuracy & Ground Truthing	Data Repeatability; Consistent Quality	Low Cost per Mile	
Satellite Imagery	7	1	4	7	Good for broad roadway network overview info
Aerial Mapping	6	6	6	5	Expanding use of AI/ML on high resolution imagery for inventories, conditions, safety
Mobile Mapping	2	7	7	1	Ideal for engineering survey
Photologging	3	5	5	3	Good for historical records, and specific area recall
Fleet & Dashcam Data	4	3	3	4	Growing uses for street level AI/ML insights
OEM Connected Vehicle Data	5	2	2	6	Good crowdsourced telematics info for driver behaviors & safety
Manual Field Collection	1	4	1	2	Traditional approach for project specific data collections per a user spec

Growing Utilization of High-Resolution Imagery & Analytics

Imagine if you could prioritize top issues across your entire County

About Vexcel

30 years of photogrammetric excellence
Aerial content across 30 countries
Data histories back to 2016
Growing AI/ML library (w/80+ features)

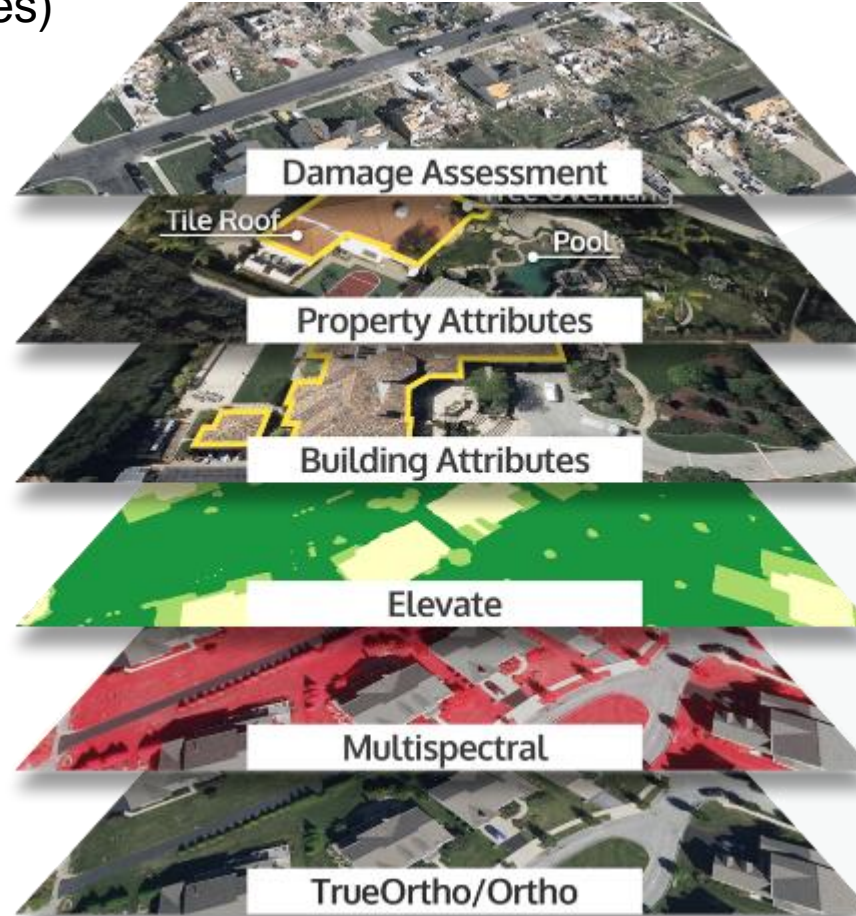

Vexcel Fleet

Vexcel Imaging

Vexcel Data Program

About Vexcel

Data Collection and Coverage

Uses Cases

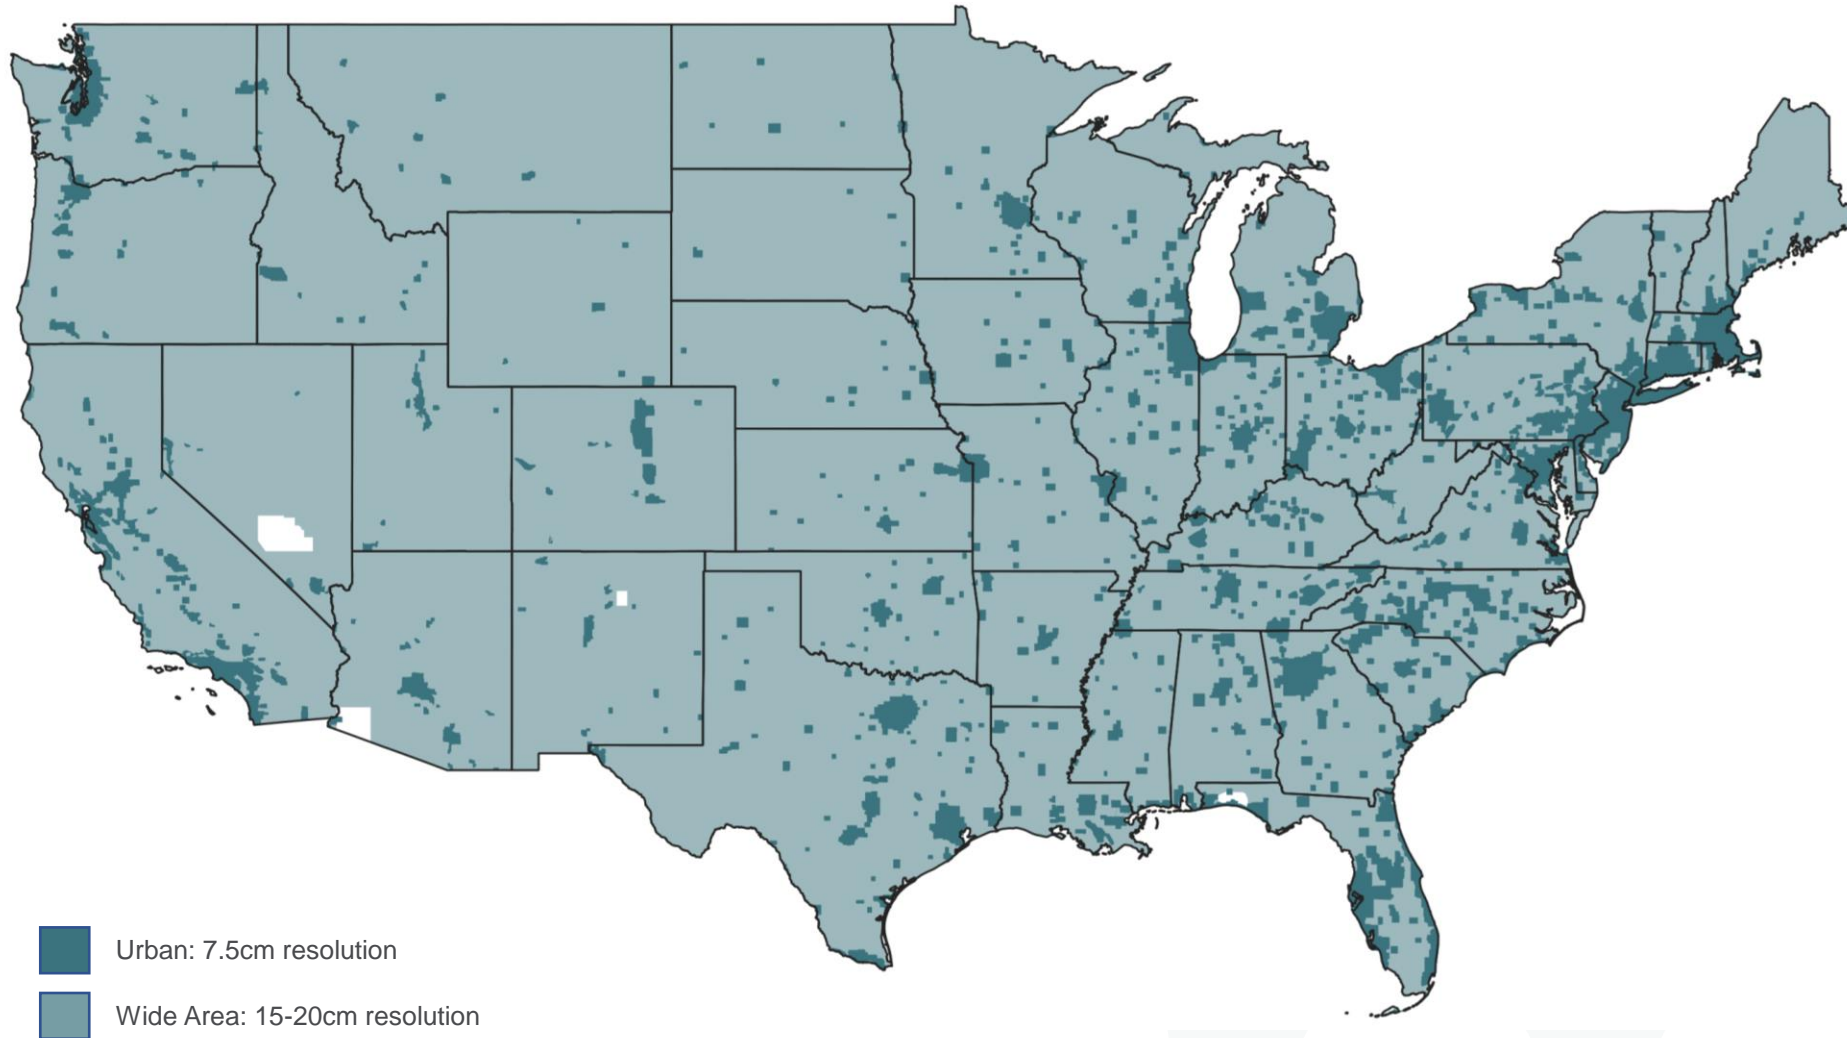

- Property Assessment
- Emergency Management
- Roadway Assessment

Analytics and Change Detection

Hollywood, FL

Existing U.S. Footprint: 3 million sq mi

Largest collection of its kind with:

- ✓ Unmatched accuracy
- ✓ High-resolution aerial imagery
- ✓ Consistency across imagery

49 states

Urban & rural collections

99.6% U.S. population

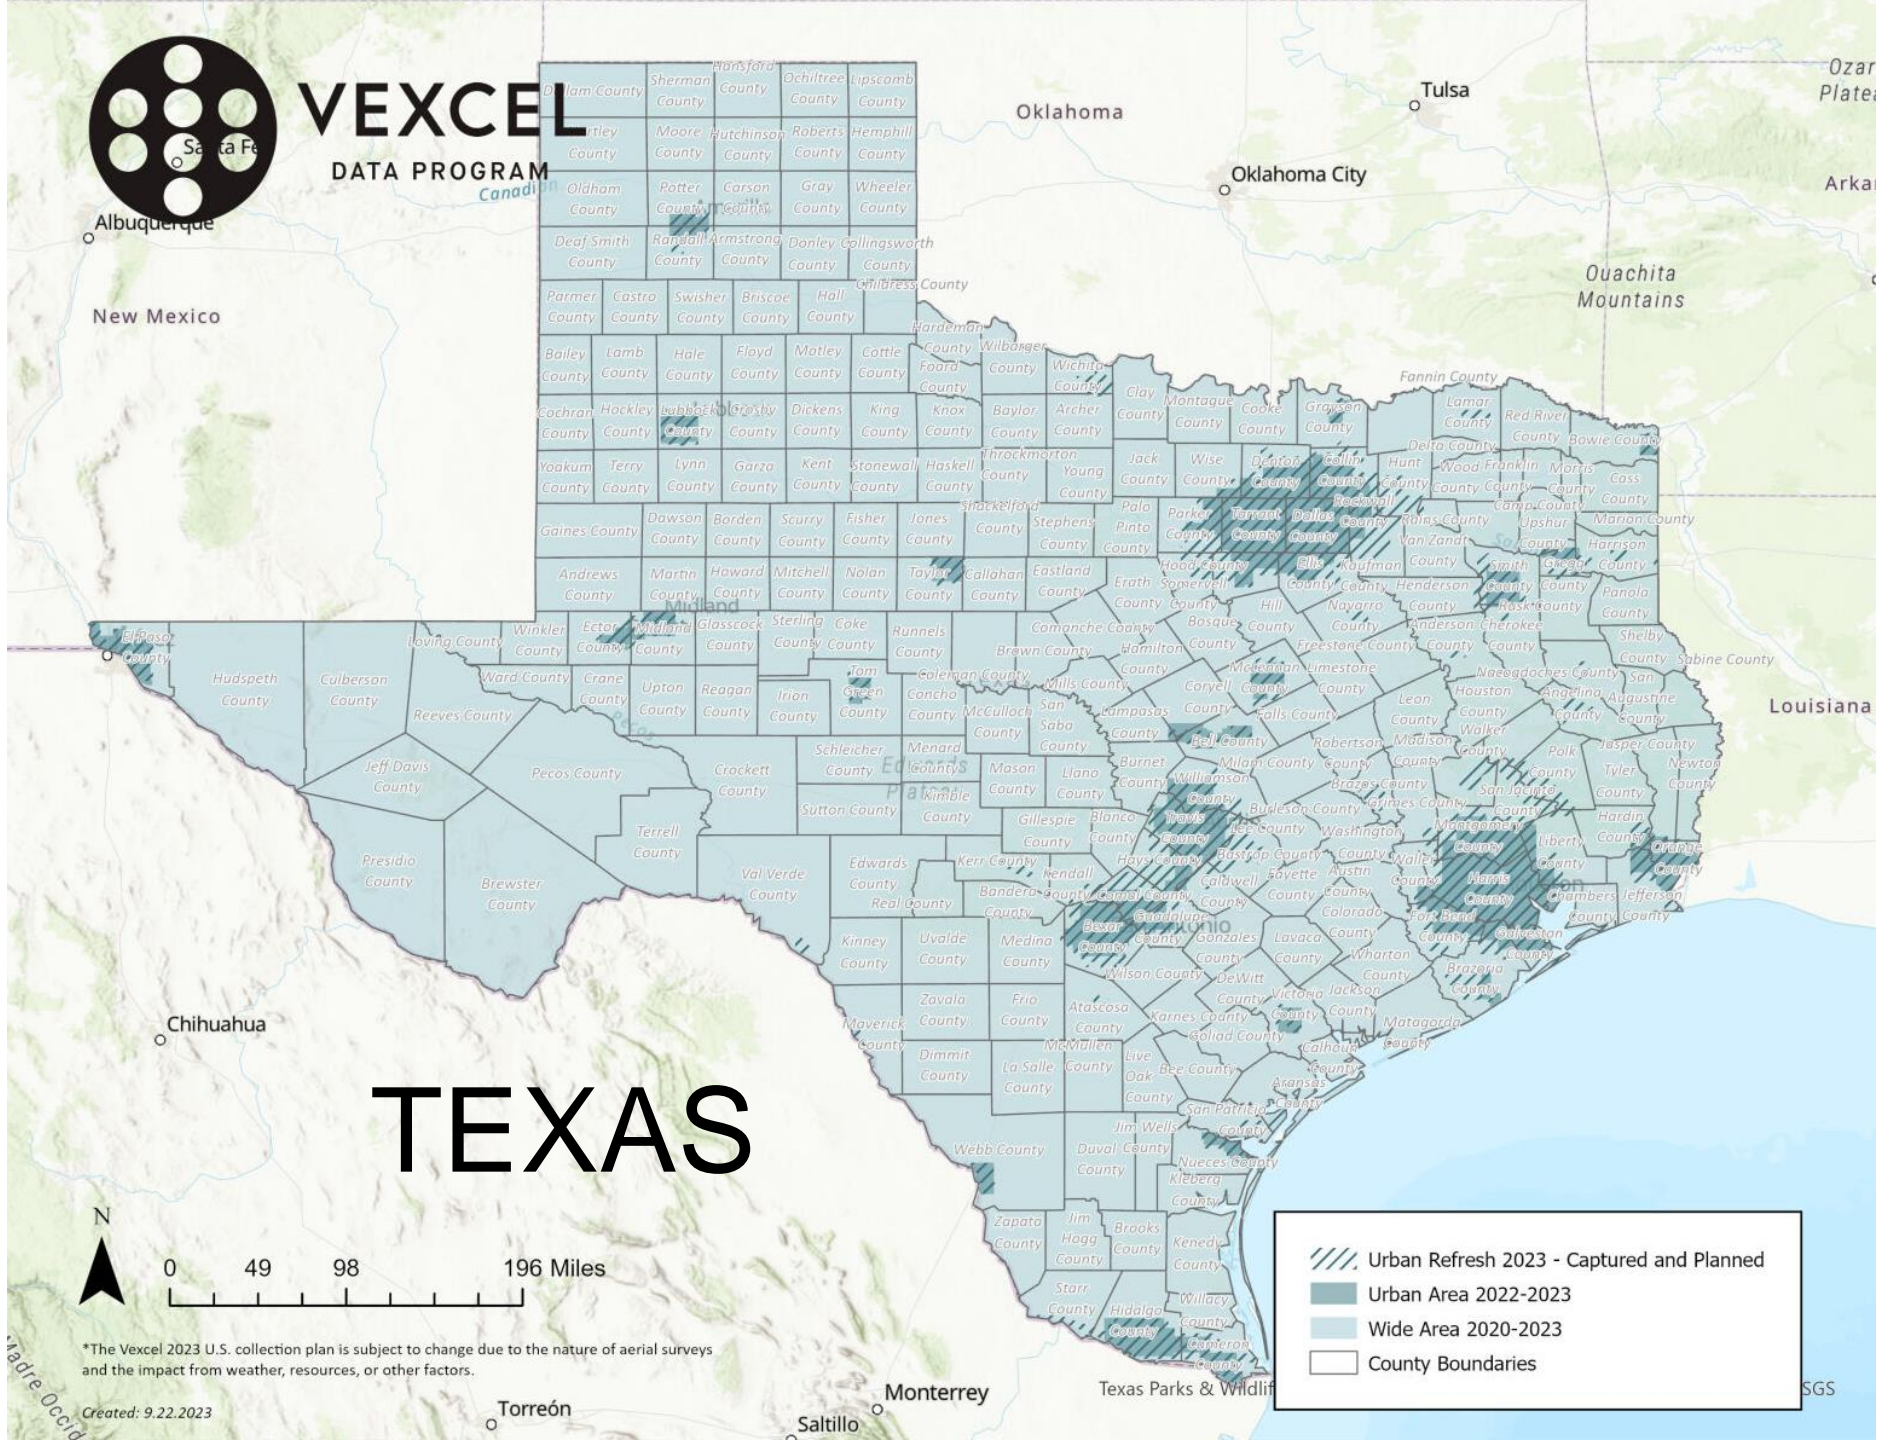

127 million U.S. households

VEXCEL

DATA PROGRAM

TEXAS

0 49 98 196 Miles

*The Vexcel 2023 U.S. collection plan is subject to change due to the nature of aerial surveys and the impact from weather, resources, or other factors.

Created: 9.22.2023

-  Urban Refresh 2023 - Captured and Planned
-  Urban Area 2022-2023
-  Wide Area 2020-2023
-  County Boundaries

7.5 cm

Orthomosaic Imagery Products

TrueOrtho

- No building lean or seamlines; color balanced; top-down
- Urban area collection
- Insight for rooftops and property surroundings
- 7.5cm resolution

Urban Ortho

- Straight-down aerial view
- Urban area collection
- Increased frequency, greater currency in U.S. urban areas
- 7.5cm resolution

Wide Area Ortho

- Straight-down aerial view of buildings, parcels, and farmlands
- Urban and rural collection
- Insight for rooftops and property surroundings
- 15-20 cm resolution

Oriented Imagery Products

Oblique

- Collected at a 45° perspective
- Detailed views—north, south, east, west—of properties, neighborhoods, buildings
- 7.5cm resolution

Nadir

- Top-down oriented images
- AI/ML applications
- 7.5-20cm resolution

Aerial Imagery & Data

Multispectral

- Near-infrared channel on camera sensors
- Optimal for classification on vegetation and fire risk
- Wide and Urban Area collection programs

Elevate

- Digital Surface Models (DSM)
 - Urban and Wide Area collection programs
- Digital Terrain Models (DTM)
 - Wide Area collection programs

Disaster (Gray Sky)

- Natural disaster collection program
- Imagery delivered typically within 24 hours after capture
- Before/after comparisons

AI/ML based Insights - Disaster Response and Recovery Damage Assessment

Lahaina, Hawaii

VEXCEL
DATA PROGRAM

Damage Assessment

Our AI analysis identified a total of 2,760 structures within the Lahaina collection area.

- **1,718 structures were completely destroyed**; 62% of all the structures in the collection area.
- **363 structures had slight to moderate damage**, ranging from some fire damage to missing shingles possibly caused from the severe winds that fanned the fires.
- **678 structures had no damage identified** in the imagery.

VEXCEL
DATA PROGRAM

AI/ML based Insights - Roadway Attributes

Roadway Elements

Access 30+ attributes for better, more precise roadway analysis

Pavement Markings

- Crosswalks
- Bicycle symbols
- Arrows
- Words
- Available for current and historical imagery

Infrastructure

- Pedestrian refuge islands
- ADA truncated domes “curb mats”
- Intersection-junctions
- Available for current and historical imagery

Condition Assessment

- Pavement marking quality score for prioritizing maintenance
- Available for current and historical imagery

Roadway Data from High-Resolution Aerial Imagery

1. Roadway Inventories for Bike and Pedestrian Facilities

- Crosswalks (standard and high visibility) at intersections and midblock
- Bicycle lanes (symbols, words and green painted lanes)
- ADA detectable curb mats (truncated dome) and pedestrian refuge islands

2. Roadway Inventories for intersections and approaches

- Exclusive Left-turn and Right-turn lanes
- Presence/Absence of crosswalks
- Presence/Absence of bicycle facilities

3. Condition Assessment of Road Markings for Maintenance Prioritization

- Identification of faded or worn pavement markings
- Development of predication models based on historic imagery

4. ADA Compliance Assessment

- Mapping of required detectable warnings on curb ramps per DOT ADA standards

5. Confirm and Document Installation of Countermeasures

- Creation of as-builts for FHWA proven Pedestrian/Bicyclist countermeasures¹ (e.g., high-visibility crosswalks, advance stop and yield lines, ped. refuge islands).

Pavement Marking Condition Comparison

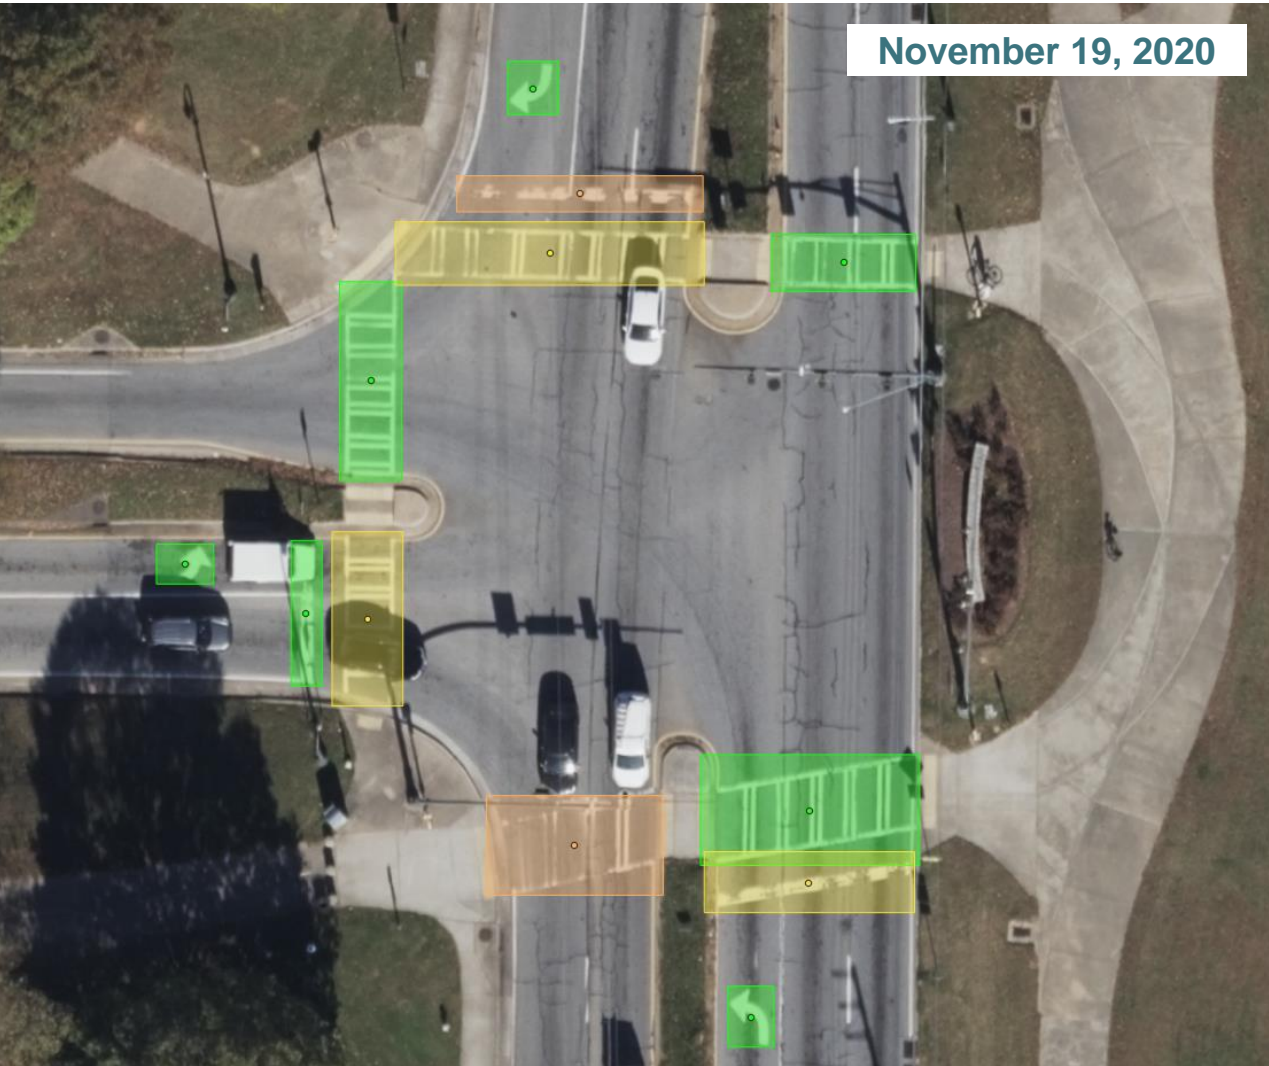

November 19, 2020

October 22, 2022

Atlanta, GA

Roadway Inventories, Condition and Change Over Time

Atlanta, GA

Pavement Marking Condition Scoring

Poor: 1

Fair: 2

Good: 3

Great: 4

Scored between 1-4 based on pavement marking imagery classified using subjective condition assessment markings.

- 4 = Great. No visible signs of defects.
- 3 = Good. Minimal signs of defects.
- 2 = Fair. Pronounced signs of defects that affect the function of the marking.
- 1 = Poor. Pronounced signs of defects that significantly affect the function of the marking.

FHWA MIRE ELEMENTS

FHWA MIRE FDE

NON-LOCAL PAVED ROADS Intersection

Intersection/Junction Geometry (116)

Definition: The type of geometric configuration that best describes the intersection/junction.

Recommended Attributes:

- | | | |
|--|---|--|
| 1. T-Intersection. | 8. Restricted crossing U-turn (i.e., RCUT, J-turn, Superstreet) intersection. | 12. Continuous green T intersection. |
| 2. Y-Intersection. | 9. Median U-turn (i.e., MUT, Michigan Left, Thru-turn) intersection. | 13. Quadrant (i.e., quadrant roadway) intersection. |
| 3. Cross-Intersection (four legs). | 10. Displaced left-turn (i.e., DLT, continuous flow (CFI)) intersection. | 14. Other. |
| 4. Five or more legs and not circular. | 11. Jughandle (i.e., New Jersey jughandle) intersection. | Note: This element has been changed since MIRE 1.0. In MIRE 1.0, this element has 8 attributes. In MIRE 2.0 this element has 14 attributes. |
| 5. Roundabout. | | |
| 6. Other circular intersection (e.g., rotaries, neighborhood traffic circles). | | |
| 7. Midblock pedestrian crossing. | | |

32

Source: FHWA

FHWA MIRE FDE

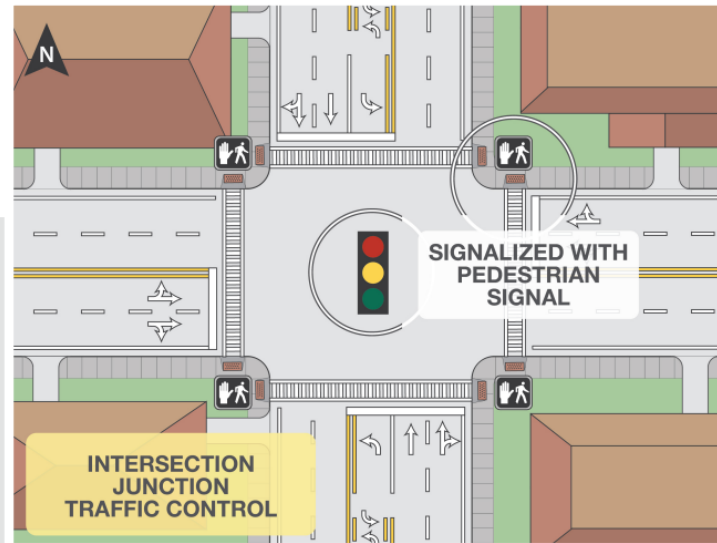

NON-LOCAL PAVED ROADS Intersection

Intersection/Junction Traffic Control (121)

Definition: Traffic control present at intersection/junction.

Recommended Attributes:

- | | | |
|---|---|---|
| 1. Uncontrolled. | 7. Flash Beacon (include Rectangular Rapid Flash Beacon). | 11. Railroad crossing, crossbucks only. |
| 2. Two-way stop. | 8. Railroad crossing, gates and flashing lights. | 12. Other. |
| 3. All-way stop. | 9. Railroad crossing, flashing lights only. | Note: This element has been changed since MIRE 1.0. In MIRE 1.0, there are 11 attributes. In MIRE 2.0, there are 12 attributes with more detail regarding type of signalization. |
| 4. Yield sign. | 10. Railroad crossing, stop-sign controlled. | |
| 5. Signalized. | | |
| 6. Pedestrian Hybrid Beacon (PHB) or High-Intensity Activated Crosswalk (HAWK). | | |

33

Source: FHWA

FHWA MIRE FDE

NON-LOCAL PAVED ROADS Intersection: Circular

Unique Junction Identifier (110)

Definition: A unique junction identifier.

Recommended Attributes: User defined (e.g., node number, LRS of primary route, etc.).

38

Source: FHWA

Source: https://highways.dot.gov/sites/fhwa.dot.gov/files/MIRE_FDE_Example_Illustrations_508.pdf

FHWA MIRE ELEMENTS

MODEL INVENTORY OF ROADWAY ELEMENTS – MIRE VERSION 2.0

136. Number of Exclusive Left-Turn Lanes

Definition: Number of exclusive left-turn lanes that accommodate left turns from this approach.

Recommended Attributes:

Numeric

140. Number of Exclusive Right-Turn Lanes

Definition: Number of exclusive right-turn lanes on approach.

Recommended Attributes:

Numeric

41. Presence/Type of Bicycle Facility

Definition: The presence and type of bicycle facility on the segment.

Recommended Attributes:

1. None
2. Wide curb lane with no bicycle markings
3. Wide curb lane with bicycle markings (e.g., sharrows)
4. Marked bicycle lane
5. Separate parallel bicycle path
6. Signed bicycle route only (no designated bicycle facility)
7. Other

147. Crosswalk Presence/Type

Definition: Presence and type of crosswalk crossing this approach leg.

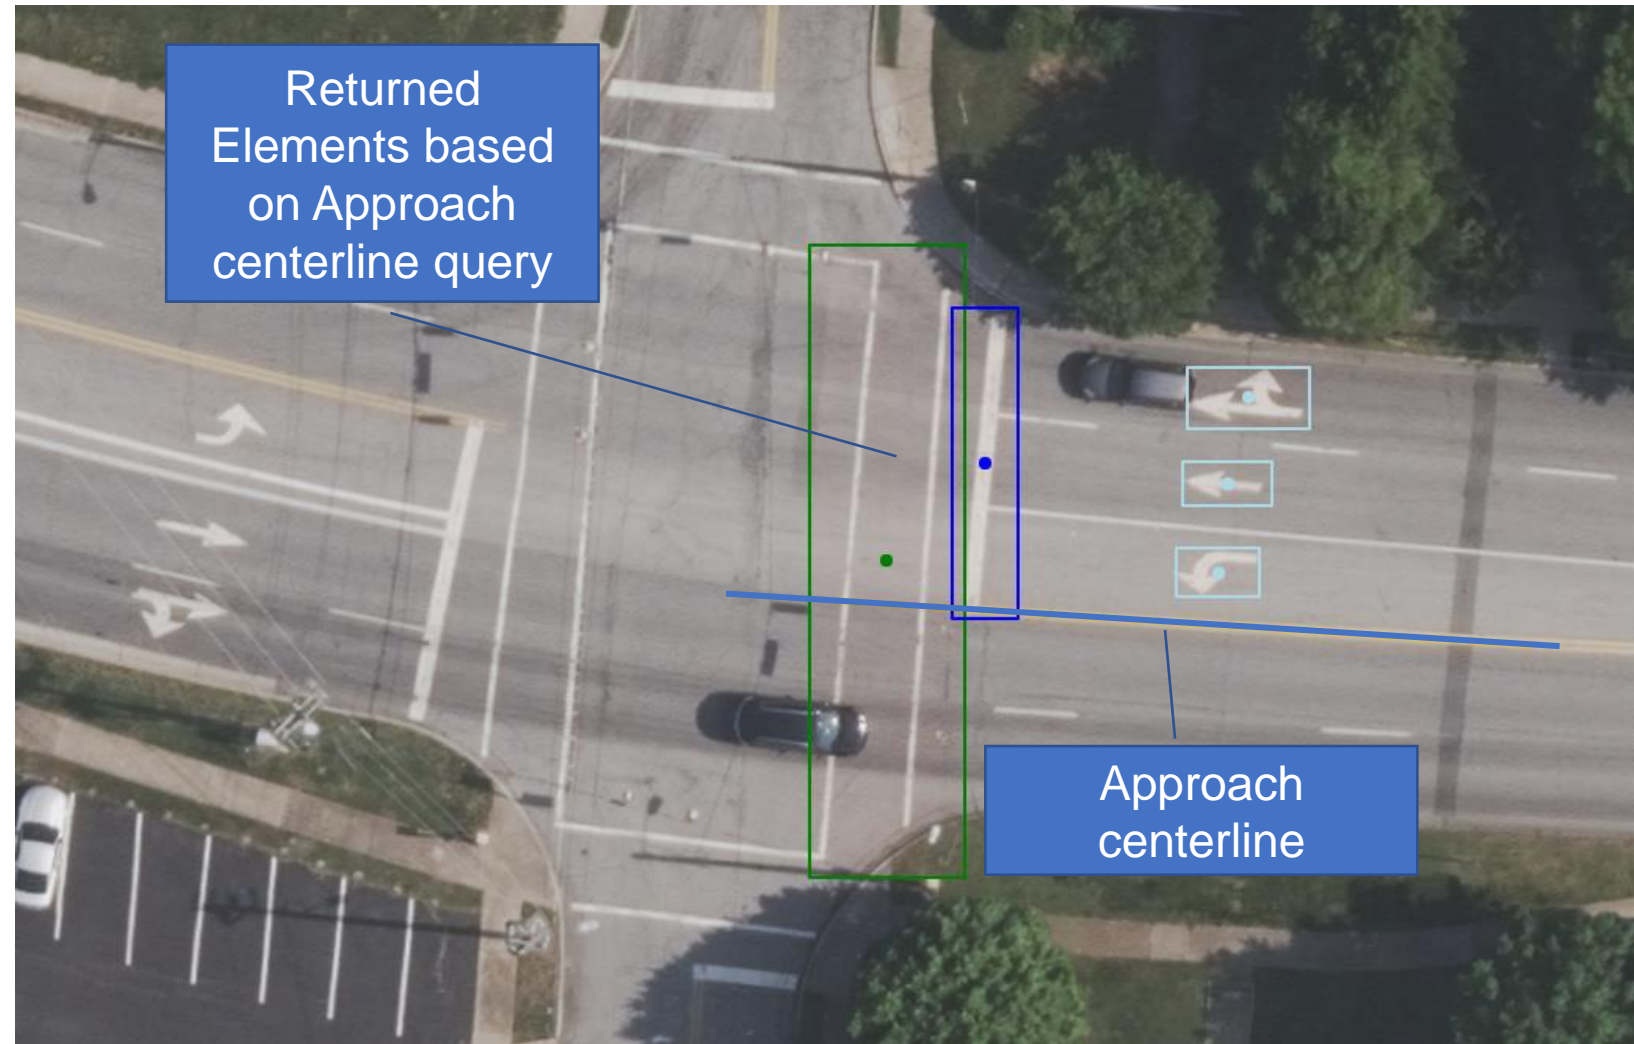

Recommended Attributes:

1. Unmarked crosswalk
2. Marked crosswalk
3. Marked crosswalk with supplemental devices (e.g., in-street yield signs, in-pavement warning lights, pedestrian bulb outs, etc.)
4. Marked crosswalk with refuge island
5. Marked with refuge island and supplemental devices (e.g., in-street yield signs, in-pavement warning lights, pedestrian bulb outs, etc.)
6. Raised crosswalk
7. Pedestrian crossing prohibited at this approach
8. Other
