

How High-Res Imagery & Change Detection can + Change the World

Chippie Kislik, PhD - Planet - October 2023

FOREST HARVESTING • British Columbia, Canada • September 21, 2022

VISIT US AT BOOTH 18

Meet the Planet Team at the Texas GIS Forum

OCTOBER 23-27, 2023 • AUSTIN, TEXAS
COMMONS CONFERENCE CENTER

SPEAKER

**CHIPPIE
KISLIK**

PreSales Engineer

**CHRIS
WILSON**

Account Executive

**AMANDA
FALKNER**

Sales Development
Representative

What could you do with Superpowers?

- X-Ray Vision
- Time Travel
- Fly anywhere in seconds

Monitor your areas of interest, discover patterns, and get timely insights

Outline

1. Remote Sensing Applications
2. Planet Capabilities
3. Change Detection
4. GIS Integrations & Imagery Pipeline

Chaudière River, Canada

**You can't fix
what you can't see.**

Remote Sensing

- **The science of identifying, observing, collecting, and measuring objects without coming into direct contact with them**
- **Examples:**
 - **Satellite imagery**
 - Topographic data (i.e., LiDAR)
 - Radar (SAR)
 - Surface temperature
 - Spectrometers
 - Hyperspectral imagers

Spatial Resolution

Aqua (MODIS)
250m Resolution

Landsat-8
30m Resolution

Sentinel-2
10m Resolution

PlanetScope (Dove)
3m Resolution

SkySat
0.5m Resolution

Worldview-4
0.3m Resolution

FINANCE & BUSINESS INTELLIGENCE

Our Constellations

Global Coverage

Planet's constellation of satellites is always-on, imaging the entire Earth every day

Frequent Revisit

Daily imagery helps you detect anomalies, take action and capitalize on change

Easy & Efficient Access

Integrate same-day imagery into your processes with Planet's APIs or online tools

Planet's broad suite of solutions

CAPTURE

Monitoring

PlanetScope
3.7 m imagery
updated on a near-
daily basis

Tasking

SkySat imagery tasking
with the highest
intraday revisit capability
commercially available

ENHANCE

Basemaps

Visually consistent
and scientifically
accurate imagery over
broad areas

Archive

Access to proprietary
datasets back to 2009
and public datasets
back to 1972

ANALYZE

Analytic Feeds

Detection and analytic
capabilities layered on top of
Planet Monitoring and
Basemaps

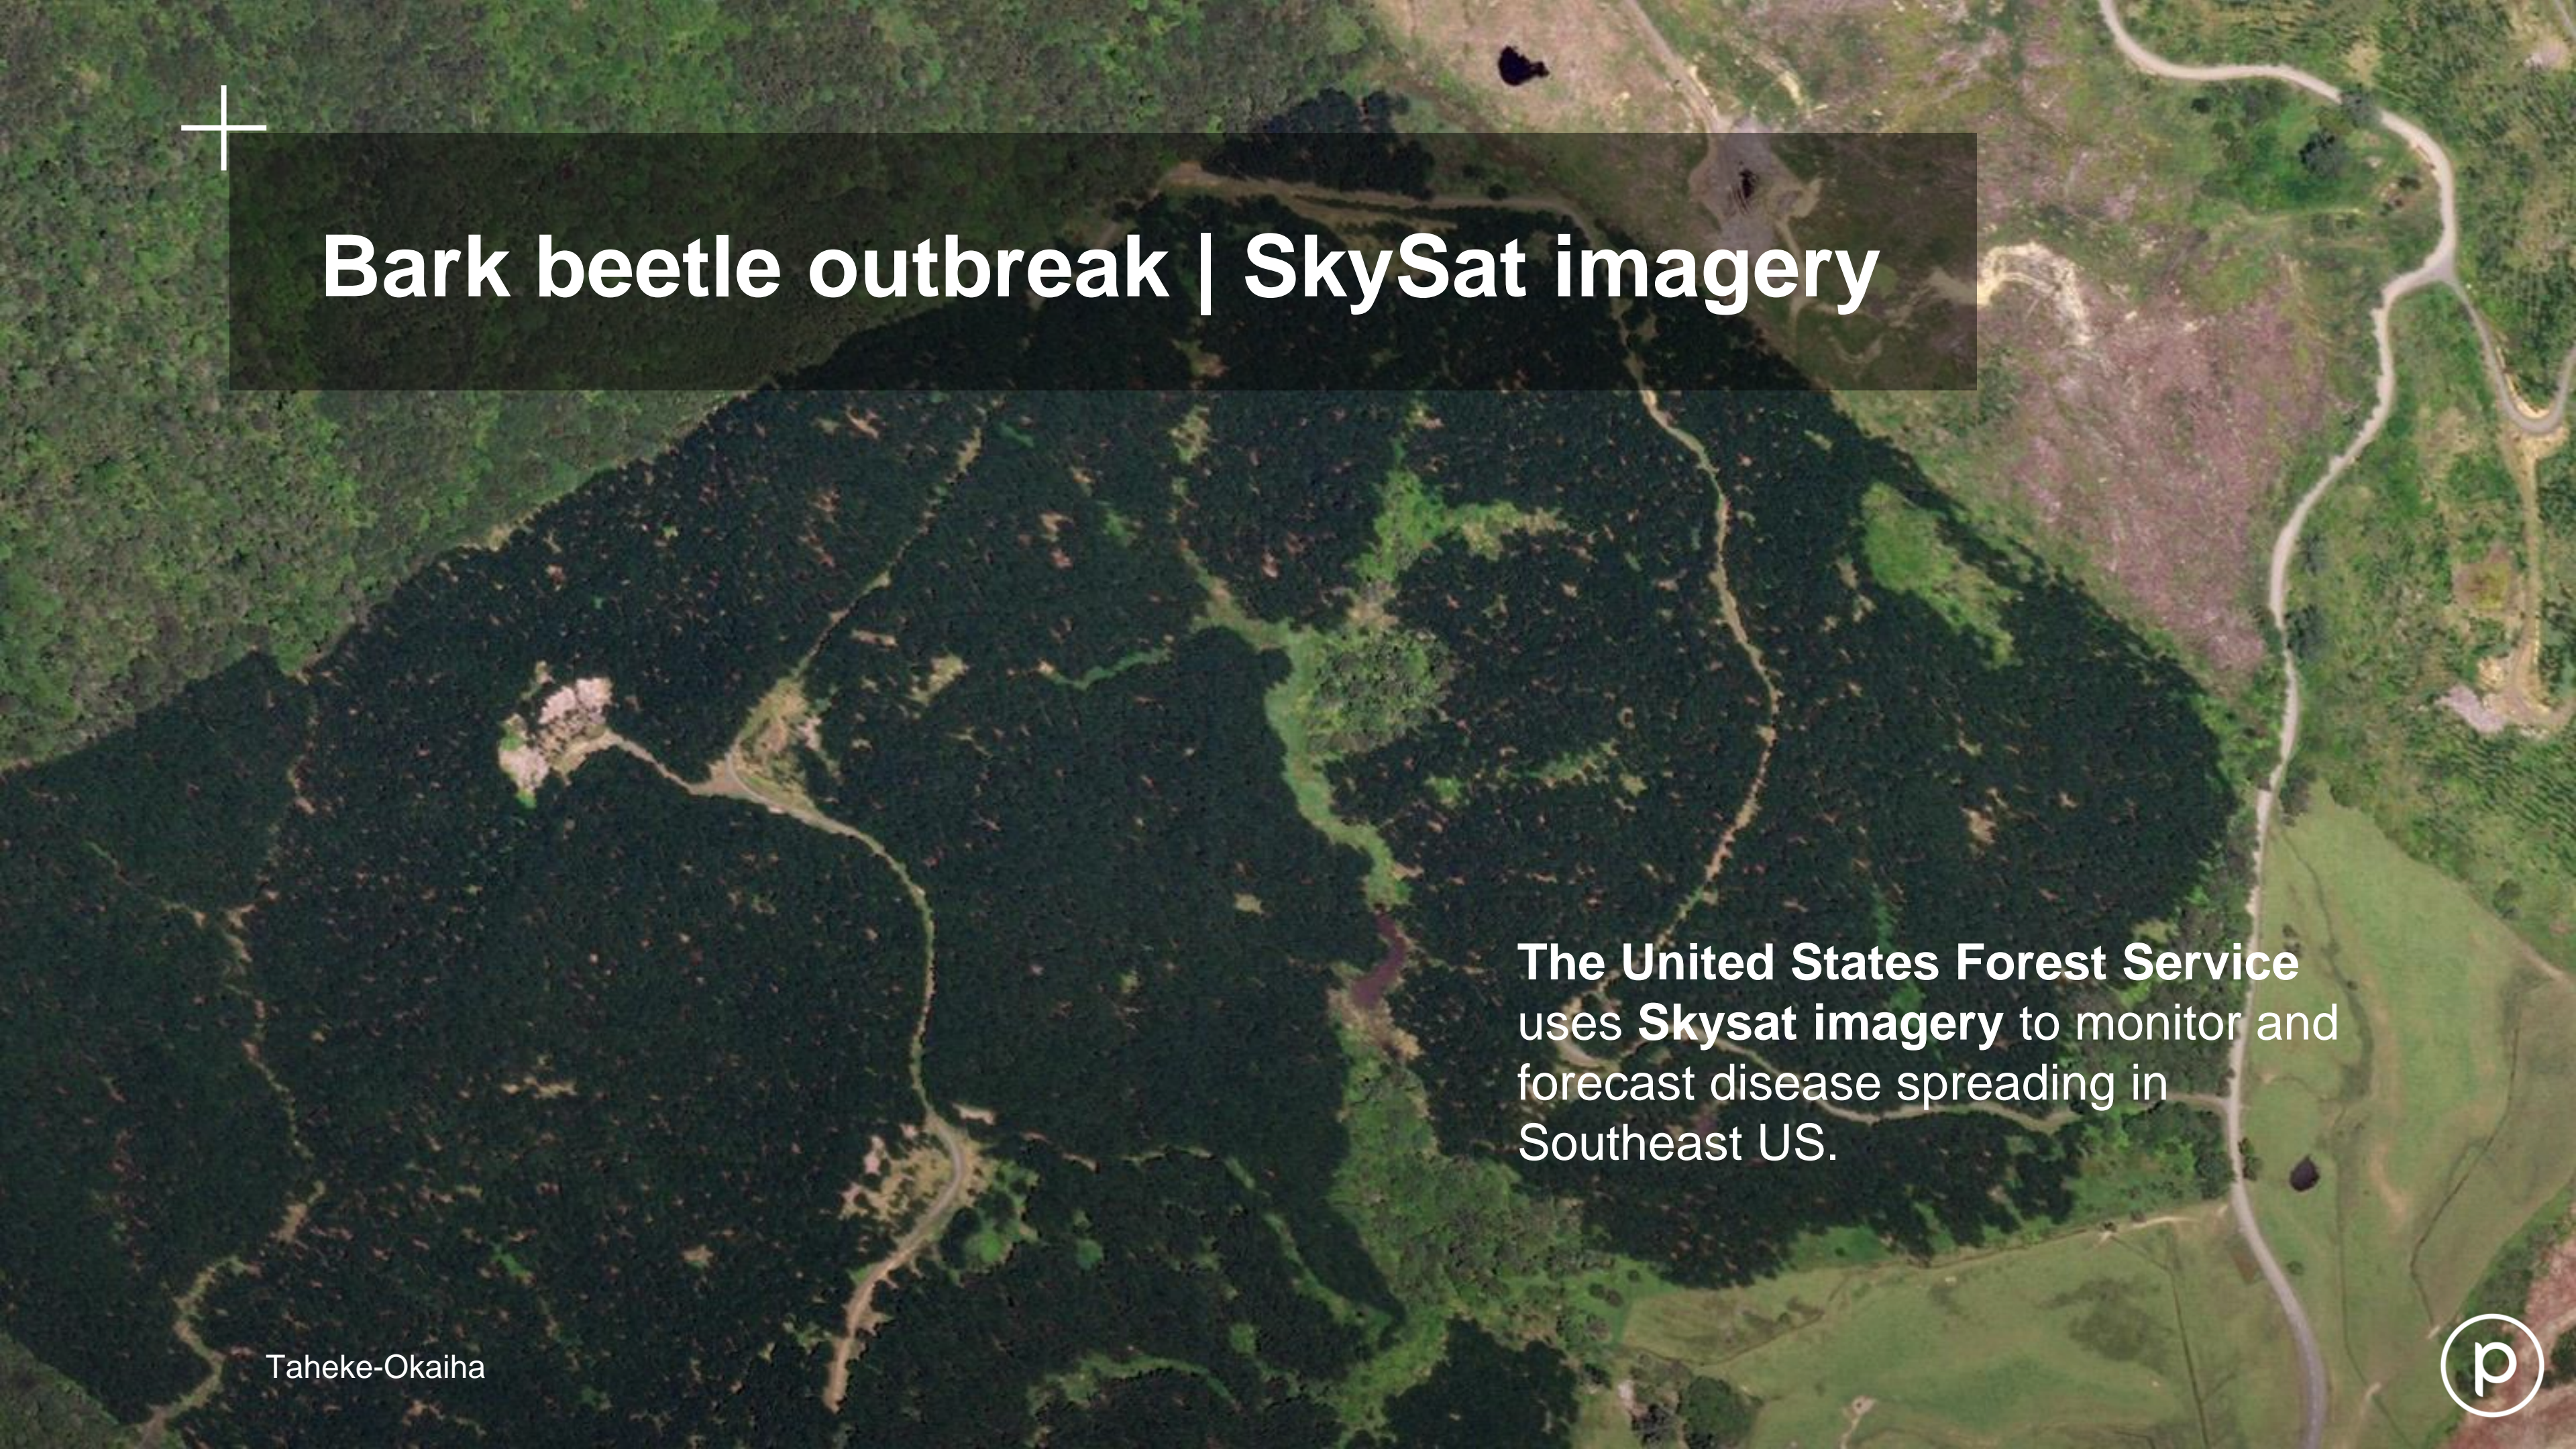

View change over time

Exit

Bark beetle outbreak | SkySat imagery

The United States Forest Service uses **Skysat imagery** to monitor and forecast disease spreading in Southeast US.

with rapid intraday revisit
capability

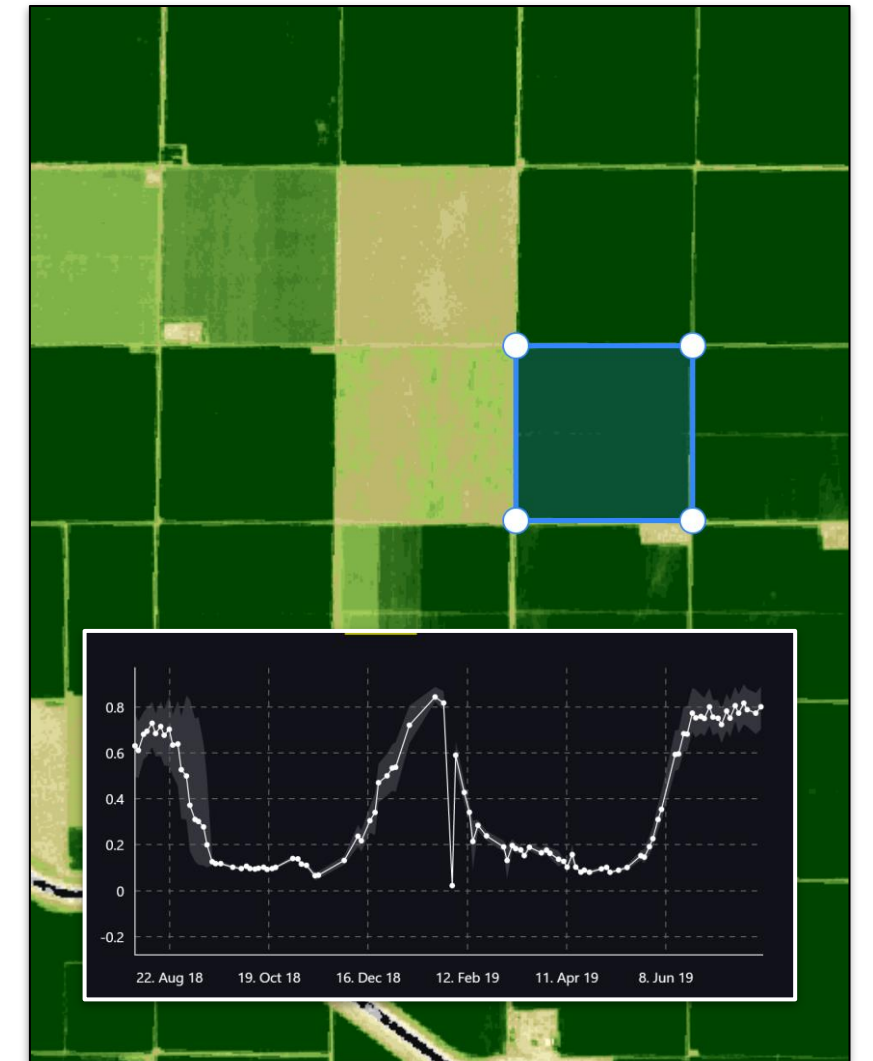

Planetary Variables

Measurements of phenomena
on the Earth's surface

Platform

API-first cloud platform to
extract insights from imagery
at scale

+ Planetary Variables Measure Key Phenomena

Measuring Key Phenomena on the Earth's Surface

SOIL WATER CONTENT

LAND SURFACE TEMPERATURE

CROP BIOMASS

FOREST STRUCTURE

FOREST CARBON

VEGETATION ENCROACHMENT

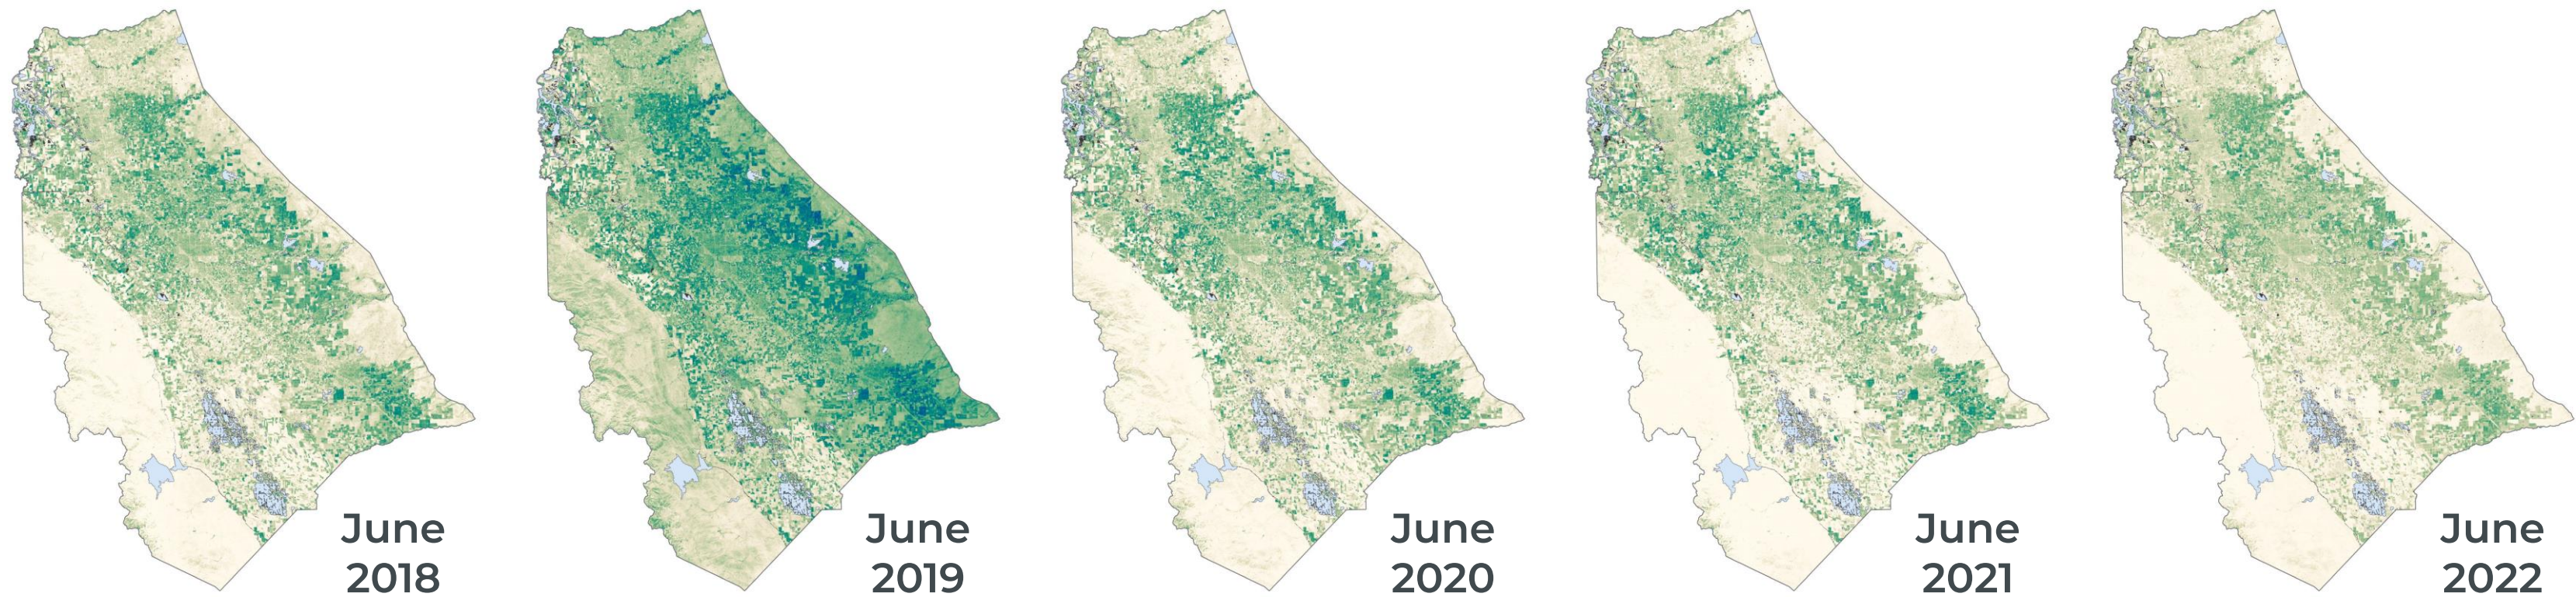

A Virtual Constellation of Planet and Public Sensors

Drought monitoring

Soil Water Content in San Joaquin, Stanislaus, and Merced Counties, California

Measuring Soil Water Content provides a consistent data feed to track dry conditions against historical norms.

Accessing Planet Data

Planet offers a broad suite of APIs, web tools, and GIS integrations to access the Planet Catalog.

UIs

Planet Explorer

Integrations

APIs

Data API

Tiles API

Orders API

Subscriptions API

GIS Integrations

Bringing Planet data to your preferred workflows

- With Planet integrations, you can **directly access** Planet imagery in leading geospatial platforms, no manual builds required.
- **Enrich your analysis** and complement your authoritative content with high-frequency Planet imagery
- Get **deeper insights, faster**, using your preferred tools and features

Google Earth Engine

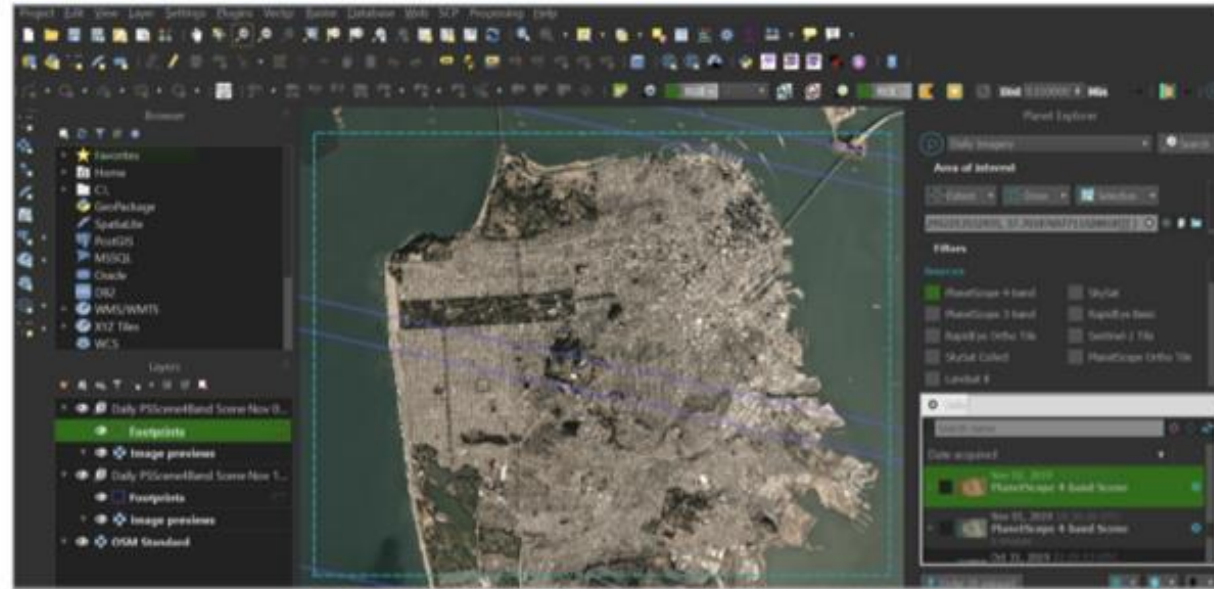

Jeddah, Saudi Arabia

How it Works

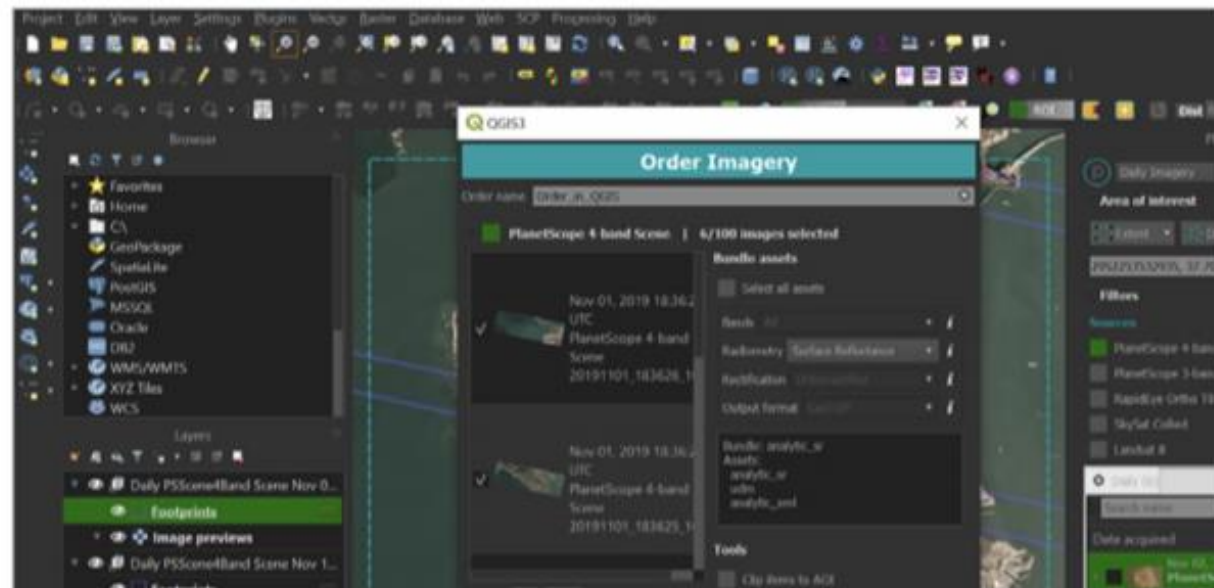

Access, search, and download Planet imagery in ArcPro & QGIS

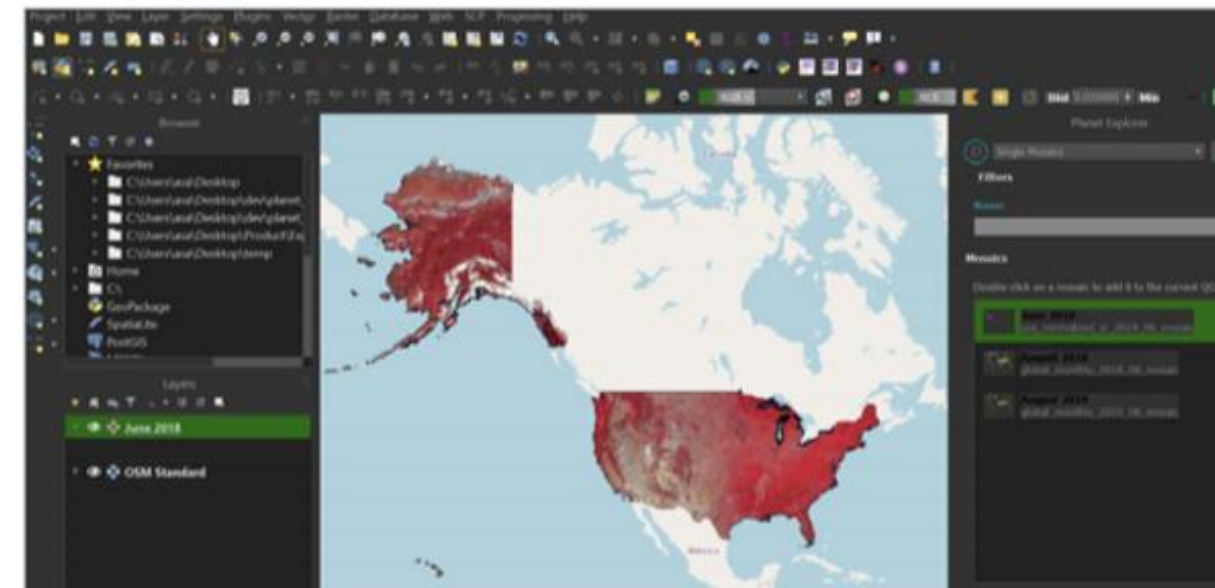

SEARCH: Easily search and filter through all available Planet imagery

DISCOVER: Find the best imagery for your analysis, whether PlanetScope or SkySat

DOWNLOAD: Efficiently download multiple images to pull into your workflow

ENRICH: Perform geospatial analytics on top of Planet imagery

How it Works

Perform large-scale analysis with Planet data in GEE

1. Upgrade to **Google Cloud Project-backed Earth Engine Account**
1. Use Planet **Order & Subscriptions APIs**
1. **Import** Planet imagery
